PHILOSOPHY

A constitutional conservative who supports personal liberty, low taxes and minimizing the Government's role in our lives.

PROFESSIONAL EXPERIENCE

Chemical Engineer
Business Manager

PRINCIPLES

Government should only collect funds from the People for what is necessary. Tax money belongs to the People. It is not the role of Government to fund special interest projects.

Free market capitalism should be encouraged. Regulations inhibit growth and ingenuity. Free markets create wealth and prosperity. Government should not choose winners and losers in business.

We are endowed with God-given human rights. Government should protect the rights of the People. I believe strongly in the 1st and 2nd amendments of the US Constitution and will defend them vigorously.

Government governs best when it is close to the People. Distant Bureaucrats should have minimal decision making power on local policy. We should maximize local control.

ISSUES

Fiscal Discipline – Utah has managed to not take on excessive debt. We should maintain this legacy and be prudent with the People's tax dollars.

Education – I believe in localization and personalization. Parents understand the needs of their children and should have input in their children's education. Bureaucracy should be limited to help our teachers succeed.

State Sovereignty – Federal overreach suppresses Utah's economy. The federal government owns more than 60% of Utah lands which removes a source of revenue to fund Utah's education system.

The Environment – Everybody appreciates fresh air and clean water. We should be good stewards of the environment while not succumbing to extremists on both sides of the issue.
